## INTERESTS

### Travel

Europe (France, Italie, England), Asia (Thaïlande, Japan, Korea)

### Entertainment

Video Game, Reading, Series, Movies

## LANGUAGES

### French

Native

### English

B1 (Intermédiaire)

full-stack developer, I am able to work on all aspects of a web project, from design to deployment, including development and testing. I am always looking for new challenges to keep progressing.

## EXPERIENCES

**Accenture Luxembourg**  
Infra Transformation Analyst

(01 June 2022 - Present)

- **Wordpress / Woocommerce development project:** (<https://indoorforest.lu>) - Design the different pages of the site. - Integration of different Wordpress plugins. - Project follow-up with the client.

<https://www.accenture.com/lu-en>

**Data Essential**  
Associate Consultant

(15 December 2019 - 31 May 2022)

- **Main missions :**
  - Clients intervention for different requests.
  - Deployment, maintenance, decommissioning of the VxRail/vmware cluster.
  - Automation of tasks.
  - Application development.
- **Development project of a "Compass" application:**
  - React front-end development.
  - Customer follow-up and implementation of requests.
  - Automation of development using GCP and automatic deployment.
- **Script Development:**
  - Python scripting development.
  - Automate manifest creation for Kubernetes.
  - Implementation of a "universal" format for users.
- **Application Modernization:**
  - Convert Python Application to React Application
  - Implementation of new functionalities requested by the client.
  - Transformation of the application into a multi-platform desktop app using electronJS.

## SOFT SKILLS

---

Technical challenge, Passionate by new technologies, Capacity to adapt, Open mind, Problem solving, Time managing, Autonomie, Team player

## REFERENCES

---

References available on request.

## EDUCATION

---

### self-taught

(01 January 2018 - Present)

IT

Self-taught in learning computer technologies, computer development (code, infra, cloud, ...)

### Haute école Robert Jacquart Differt

(01 January 2002 - 30 June 2010)

CESS Arts Appliqués, Arts Appliqués

High School degree in art.

## TECHNICAL SKILLS

---

### Front-End Development

HTML5 (Expert), CSS3 (Expert), SaSS (Expert), Apollo Client (Advance), Bootstrap (Advance), D3JS (Intermédiaire), ElectronJS (Intermédiaire), Git (Advance), Jest (Beginner), Joomla (Beginner), JQuery (Expert), JavaScript (Advance), Material-UI (Expert), npm (Advance), React (Advance), React-Router Dom (Advance), Redux (Intermédiaire), TypeScript (Intermédiaire), Wordpress & WooCommerce (Intermédiaire)

### Back-End Development

GraphQL (Intermédiaire), MariaDB (Beginner), Airtable (Beginner), Apollo GraphQL Server (Advance), Express (Advance), MongoDB (Advance), MySQL (Intermédiaire), NodeJS (Advance), PHP (Beginner), Python (Intermédiaire), Yarn (Advance)

### SysAdmin, Platform & Cloud

Apache (Beginner), GCP (Beginner), Linux Server & Ubuntu Server (Intermédiaire), Nginx (Intermédiaire), Synology Nas (Advance), VxRail, vCenter, vmware (Intermédiaire)

### DevOps & Automation

Ansible & Terraform (Beginner), Kubernetes (Intermédiaire), Docker (Advance), Github & Gitlab (Advance), Grafana & Prometheus (Beginner), Packer (Beginner), Rancher (Beginner), Watchtower (Advance), Portainer (Advance)

### Data

GCP - BigQuery (Beginner), GCP - Cloud Function (Beginner), GCP - SQL (Beginner), GCP - Data Studio (Advance)

### Other

Jira, Bitbucket, Confluence (Advance), AdobeXD, Illustrator, Photoshop (Intermediate), Google Suite (Advance), Microsoft Suite (Advance), Terminal, SSH, bash (Advance)

## PERSONAL PROJECTS

---

### Netflix Clone

(01 January 2022 - 01 May 2023)

full-stack Javascript projects

My goal was to make a clone of Netflix using React and Redux as well as node-sass for styling. I also use the TMDB API to retrieve movies and series. I used Express as well as Apollo GraphQL to create schemas and resolver finally I used MongoDB to store some data.

↪ <https://netflix-clone.gge2705.synology.me/home>

React, React-Router-Dom, NodeJS / Express, ApolloGraphQL (Client & Server), Node-Sass, TypeScript, Redux, Docker, Github, Synology Nas, MongoDB

### Portfolio CI/CD

(10 May 2023 - 01 April 2020)

Setup of a CI/CD chain

The objective of this project was not only to update my CV using a portfolio that could serve as a testimony of my skills but also to set up a chain of CI / CD (Continuous Integration / Continuous Delivery) using Gitlab CI/CD. and automatic deployment on a Synology server.

**N.B.** For a demo of the CI/CD channel, it must be done live.
